

LOZADA DANIEL JOSAPHAT

Software Engineer/Developer

Summary

Software Engineer with 3+ years' experience in full-stack development and 2+ years as a System Engineer providing technical support services. Specialized in backend technologies, cloud services, and scalable application development. Skilled in troubleshooting complex systems, delivering user-centric solutions, and collaborating with cross-functional teams to drive high-quality outcomes.

Experience

● 2022 - Present

Software Engineer

Supafaya PTE, Ltd. (Full-Time)

- Designed and deployed full-stack web applications using Next.js, Node.js, NestJS, Firebase, Vercel, TypeScript and more.
- Developed and integrated high-performance REST APIs.
- Maintained cloud infrastructure on Google Cloud Platform.
- Collaborated within Agile/Scrum teams to deliver scalable solutions.

● 2022 (6 months)

Junior Software Developer (Full-Stack)

MetaverseGo (Contract-Based)

- Maintained and enhanced cloud infrastructure with AWS, Lambda, MongoDB and the Serverless Framework.
- Built and deployed scalable backend microservices using Fastify.
- Collaborated in Agile/Scrum teams to deliver high-quality, efficient solutions.
- Integrated internal and third-party APIs, including secure payment gateways.

● 2019 - 2022 (30 months)

System Engineer (Service Desk)

Tata Consultancy Services (Full-Time)

- Provided technical support via phone, ticketing system, remote assistance, and live chat.
- Documented, updated, and tracked incident and request tickets with attention to detail.
